Professional Summary

Software Development Engineer with experience in banking/payments and e-commerce platforms. Skilled in highly scalable REST APIs, backend services, webservices with focus in Java and Python languages in addition to front-end web development.

Technical Skills

Languages: C, C++, C#, CSS, Html, Java, JavaScript, Node.Js, Php, Pl/Sql, Python, React
Databases: Cassandra, Maria DB, Mongo DB, MSSQL, MySQL, Oracle DB, Postgres, Redis
Platforms: AWS, Azure, Django, Docker, Dropwizard, GCP, Git, Hadoop, Kafka, Kubernetes, Spark, Spring
Others: Data Structures, Algorithms, System Design, Agile, Kanban, Software Development Life Cycle
Soft Skills: Aspiring Leader, Critical thinker, Data-driven, Innovative mindset, Keen Observer

Work Experience

Florida State University

Full Stack Developer

Oct 2022 – Present

Tallahassee, Florida

- Enhancing, maintaining and managing 10+ websites of College of Fine Arts department at Florida State University.
- Led projects to migrate all CFA websites to a new platform with WordPress and Bricks improving user experience.
- Optimized website functionality and performance with Php, JavaScript and CSS thereby boosting user engagement.

Flipkart

Software Development Engineer

Aug 2021 – Jul 2022

Bangalore, India

- Collaborated with the Search Experience team of Flipkart and contributed to 6+ Java and Python backend micro services responsible for fetching and highlighting products on search.
- Undertook complete ownership of 2 back-end REST API services of Spotlight and Snippet and spearheaded several search features end-to-end along with A/B testing, deploying and monitoring them.
- Designed the search highlight micro service architecture from scratch and lowered the response time of the API to less than 5 ms by pre-computing data with ETL data pipelines, Kafka, Hadoop FS, Spark, Mongo Db and Redis caching.
- Integrated ads into search resulting in 15% increased ad impressions and improved user conversion rate by 3%.

NCR Corporation

SW Engineer II

Jul 2018 - Aug 2021

Hyderabad, India

- On boarded NCR's flagship payment switch software called Authentic and contributed to various J2EE web applications and core Java transaction processes.
- Oversaw major banking clients and resolved over 80% of software backlog defects and vulnerabilities by streamlining processes and innovating internal dev tool prototypes.
- Devised a Java tool using JRJC Rest API to monitor SLAs of Jira backlog items and implemented a notification system for dev personnel thereby achieving over 95% SLA adherence.
- Pioneered a query tool with Django framework in Python using Natural Language Processing which takes in user's simple English input to query real time ATM information from database.

Spyry Technologies

Ethical Hacking Intern

Jun 2017 - Jul 2017

Bangalore, India

- Explored the world of Ethical Hacking with experienced cyber security professionals and assisted with pen testing.
- Worked with clients and delivered detailed vulnerability reports of their websites to help them avoid security risks.

Projects

Simple GPT | Python, Pytorch, NLP, LLM

- Developed and trained a Large language model with movie scripts and novels using Pytorch framework in Python.
- Utilized neural networks and transformer architecture to train the model for more accurate user prompt responses.

E-Commerce Customer Segmentation | Python, ML

- Developed a machine learning algorithm to group customers into segments based on user history and behaviour.
- Programmed to get the best combination of various ML algorithms like k-means clustering, random forest etc.

Education

Florida State University

Master of Science, Computer Science

Aug 2022 – May 2024

Tallahassee, Florida

Jawaharlal Nehru Technological University

Bachelor of Technology, Electronics and Communication Engineering

Sep 2014 – May 2018

Hyderabad, India
